

This Operational Alert is being issued pursuant to Section 20, GT&C, of EGT's Tariff to notify shippers of planned maintenance at EGT's Allen Compressor Station located in Hughes County, Oklahoma and in EGT's West 2 Pooling Area. The maintenance will begin **April 16th, 2026**, with an anticipated completion date of **April 21st, 2026 at 09:00**.

Based on current nominations, EGT anticipates that primary firm services through Allen Compressor Station will be scheduled to approximately 80-90% of MRO quantities during the outage.

Unforeseen issues, including, but not limited to, nominations, weather conditions, storage needs, etc., may result in further scheduling reductions in primary firm services. In the event that unforeseen issues do occur, EGT will evaluate nominations, on a case-by-case basis, based on daily operations to alleviate impacts to the extent possible. During this planned maintenance, shippers should nominate from their contractual MRO location to reduce risk of scheduling reductions. Should any of the details of this posting change, EGT will notify its shippers and update this notice accordingly.

EGT will schedule nominations, if needed, on each impacted day in accordance with its tariff. This alert will remain in effect until further notice.

If you have any questions concerning this alert, please contact your Customer Solutions Representative.
