

This Operational Alert is being issued pursuant to Section 20, GT&C, of EGT's Tariff to notify shippers of planned maintenance at EGT's Amber Compressor Station. Effective **Monday, April 13th, 2026**, and continuing through **Saturday, April 18th, 2026, at 09:00**, EGT will conduct planned maintenance on its Amber Compressor Station, located in Grady County Oklahoma and in EGT's West 1 Pooling Area.

As referenced in EGT Critical Notice #6326 (Line AD Pig Runs), EGT anticipates impacts to all its services, including primary firm from **April 13th, 2026** through **April 16th, 2026**. During this maintenance period, all receipt points west of the Amber Compressor Station will be subject to reductions and may be scheduled to the following approximate MRO quantities:

- **April 13th**: 40% - 50%
- **April 14th – 15th**: 70% - 80%
- **April 16th**: 80% - 90%
- **April 17th**: 100%

Unforeseen issues, including, but not limited to, nominations, weather conditions, storage needs, etc., may result in scheduling reductions in primary firm services. In the event that unforeseen issues do occur, EGT will evaluate nominations, on a case-by-case basis, based on daily operations to alleviate impacts to the extent possible. During this planned maintenance, shippers should nominate from their contractual MRO location to reduce risk of scheduling reductions. Should any of the details of this posting change, EGT will notify its shippers and update this notice accordingly.

EGT will schedule nominations, if needed, on each impacted day in accordance with its tariff. This alert will remain in effect until further notice.
