

This Operational Alert is being issued pursuant to Section 20, GT&C, of EGT's Tariff to notify shippers of planned maintenance at EGT's Byars Lake Compressor Station. Effective **Tuesday, October 6th, 2026**, and continuing through **Saturday, October 10th, 2026, at 09:00**, EGT will conduct planned maintenance on its Byars Lake Compressor Station located in McClain County, Oklahoma and in EGT's West-2 Pooling Area.

As referenced in **EGT Critical Notice #6525 (Amber to Ada Pig Run)**, EGT anticipates impacts to all its services, including primary firm on **October 7th, 2026**.

Primary firm services nominated through Byars Lake Compressor Station will be scheduled to approximately **80-90%** of MRO quantities during the entire outage.

Unforeseen issues, including, but not limited to, nominations, weather conditions, storage needs, etc., may result in scheduling reductions. In the event that unforeseen issues do occur, EGT will evaluate nominations, on a case-by-case basis, based on daily operations to alleviate impacts to the extent possible. During this planned maintenance, shippers should nominate from their contractual MRO location to reduce risk of scheduling reductions. Should any of the details of this posting change, EGT will notify its shippers and update this notice accordingly.

EGT will schedule nominations, if needed, on each impacted day in accordance with its tariff. This alert will remain in effect until the completion of the maintenance.

If you have any questions concerning this alert, please contact your Scheduling Representative.
