

MRT CAPACITY AVAILABILTY

August 25, 2022

TO ALL MRT CUSTOMERS AND POTENTIAL CUSTOMERS

RE: NOTICE OF CAPACITY AVAILABLE FOR SEPTEMBER 2022

Enable Mississippi River Transmission, LLC has available firm capacity for transportation, as well as FSS. Please see prior notices posted under Non-Critical Notices. MRT also has interruptible capacity for transportation from time to time under Rate Schedules IT (including Overrun Services), ISS and PALS. MRT is willing to consider discounts on a long and short term basis for such available interruptible capacity. Capacity available for interruptible services is generally limited by contractual and operational considerations. MRT may also have available capacity for transportation under Rate Schedule FT from time to time along various segments. Interested customers and potential customers should check the capacity section of MRT's website to view unsubscribed receipt and/or delivery point amounts and locations. Any such capacity will be subject to the general terms and conditions of MRT's currently effective tariff, including the provisions of Section 8 which address nominations, scheduling, constant flow rate obligation and other conditions contained therein.

Customers and potential customers who are interested should contact Mike Stoll at 636-812-7121.
