

This Operational Alert is being issued pursuant to Section 20, GT&C, of EGT's Tariff to notify shippers of maintenance at EGT's Amber Compressor Station located in Grady County, Oklahoma and in EGT's West 1 Pooling Area. The maintenance will take place on **October 18th, 2023** and is anticipated to be completed by the end of the gas day.

Primary firm services nominated through Amber Compressor Station will be scheduled to approximately 70-85% of MRO quantities during the outage.

Unforeseen issues, including, but not limited to, nominations, weather conditions, storage needs, etc., may result in further than anticipated scheduling reductions. In the event that unforeseen issues do occur, EGT will evaluate nominations, on a case by case basis, based on daily operations to alleviate impacts to the extent possible. During this planned maintenance, shippers should nominate from their contractual MRO location to reduce risk of scheduling reductions. Should any of the details of this posting change, EGT will notify its shippers and update this notice accordingly.

EGT will schedule nominations, if needed, on each impacted day in accordance with its tariff. This alert will remain in effect until the completion of the maintenance.

If you have any questions concerning this alert, please contact your Scheduling Representative.
