

New Information Posted on 5/28/26:

The maintenance is now anticipated last through **Saturday, June 6th, 2026, at 9:00 a.m.** All other details from the previous posting (Critical Notice # 6394) remain unchanged.

Previously posted on 4/30/26:

This Operational Alert is being issued pursuant to Section 20, GT&C, of EGT's Tariff to notify shippers of maintenance at EGT's Byars Lake Compressor Station located in McClain County, Oklahoma and in EGT's West-2 Pooling Area. The maintenance will begin **June 2nd, 2026**, and is anticipated to be completed by **9:00 a.m. on June 5th, 2026**.

Primary firm services nominated through Byars Lake Compressor Station will be scheduled to approximately **80-90%** of MRO quantities during the outage.

Unforeseen issues, including, but not limited to, nominations, weather conditions, storage needs, etc., may result in scheduling reductions. In the event that unforeseen issues do occur, EGT will evaluate nominations, on a case-by-case basis, based on daily operations to alleviate impacts to the extent possible. During this planned maintenance, shippers should nominate from their contractual MRO location to reduce risk of scheduling reductions. Should any of the details of this posting change, EGT will notify its shippers and update this notice accordingly.

EGT will schedule nominations, if needed, on each impacted day in accordance with its tariff. This alert will remain in effect until the completion of the maintenance.

If you have any questions concerning this alert, please contact your Scheduling Representative.
