

This Operational Alert (OA) is being issued pursuant to Section 20, GT&C of EGT's Tariff to notify shippers of planned end-of-season (EOS) maintenance at EGT's Chiles Dome Storage Facility with an effective date of April 14th, 2023, and an anticipated completion date of April 20th, 2022.

Shippers system-wide shall maintain actual receipts and deliveries commensurate with scheduled volumes. EGT will have limited operational flexibility to manage pipeline imbalances and anticipates it will be unable to support unscheduled long positions. EGT may reduce scheduled receipts intraday to balance with the corresponding deliveries as necessary to maintain system deliverability and operational integrity. EGT requires all delivery point operators to keep actual daily takes out of the system equal to or greater than scheduled quantities, regardless of their cumulative imbalance position, unless scheduled with EGT. EGT will schedule receipts and deliveries in accordance with EGT's Tariff.

Should any of the details of this posting change, EGT will notify its shippers and update this notice accordingly.

If you have any questions concerning this alert, please contact your Customer Solutions Representative.
