

This System Protection Warning is being issued pursuant to Section 9, GT&C, of MRT's Tariff to notify all parties of unplanned maintenance at the Perryville Compressor Station located in The Perryville Hub.

The unplanned maintenance on the Perryville Compressor Station will begin immediately, with an undetermined completion date.

Based on current nominations, MRT does not anticipate impacts to its primary firm services. However, unforeseen issues, including, but not limited to, nominations, weather conditions, etc., may result in scheduling reductions. In the event that unforeseen issues do occur, EMRT will evaluate nominations, on a case by case basis, based on daily operations to alleviate impacts to the extent possible.

Shippers should nominate based on their contractual rights to reduce the risk of becoming a lower priority should scheduling become necessary.

This Critical Notice will remain in effect until further notice and will be updated if more information becomes available. This maintenance can also be referenced on EGT's EBB (Critical Notice #4866).

If you have any questions concerning this System Protection Warning, please contact your Scheduling Representative.
