This Operational Alert is being issued pursuant to Section 20, GT&C, of EGT's Tariff to advise shippers system wide that they will be required to maintain actual receipts and deliveries commensurate with scheduled volumes, **effective immediately and continuing until further notice**. EGT will be unable to support long imbalance positions and will be unable to provide any tolerance for long positions. EGT will not schedule short imbalance payback and will also not be allowing shippers to utilize its Nomination Balancing Service (NBS) in a way that would create a long position in that cycle or on that day.

The availability of balancing and Interruptible non-ratable services will be limited. Hourly non-ratable nominations must be pre-approved or within the posted limits on EGT's Daily Operating Plan. EGT will continue to monitor the pipeline's pressure and imbalances and will, if necessary, take further actions, including the issuance of one or more Operational Flow Orders (OFO).

EGT will schedule receipts and deliveries in accordance with EGT's Tariff. This Operational Alert will remain in effect until further notice and will be updated as more information becomes available.

If you have any questions concerning this Alert, please contact your Scheduling Representative.
